

A few years ago an old monk, Huang Yousheng, who lives in Jinan, Shandong province, and who had been cultivating since a very young age, revealed that he had reached an enlightenment level and was able to communicate with an alien, whose code name was AK5T-S9B-KUT9B92, and that he had been told many things about extraterrestrial civilizations, and their study of humans on earth.

5. Aliens laugh at the absurdity of 'evolution'

Alien life AK5T-S9B-KUT9B92 has travelled through many Galaxies, and has checked the scientific and technical data in the record centres of at least 50 galaxies, and found that there are continuous records documenting human civilization over a period of more than 80 million Earth years. AK5T found that the emergence and the disappearance of human civilizations were dominated by some higher life; or in a word: 'everything is arranged by God' and everything has its destiny.

2,600 Earth years ago, alien life AK5T was still relatively young, and liked to wander around.

Once he flew a NU-Y7C type flying saucer which was improved by himself. He entered a space channel which was not frequently being used, to enter galaxy clusters called HRW3-EE clusters, 3 million light years from the blue-ray of galaxies. The civilization of these clusters is quite unique, they had a much more clever way to use the energy of high energy particles.

In the records of their civilisation, there were giants living on earth tens of millions of years ago, and they were 3 to 5 times larger than present human beings. Also, the animals and stock they had were not like the cows and sheep of today, they were dinosaurs. Some of those dinosaurs were domestic, some were wild, just like ducks now, some wild and some domestic.

But now, they find that the interpretations of pre-existing human civilization by humans on earth today are really strange. Darwin's theory of evolution must be the biggest joke on the human race. In accordance with the theory of evolution, humans could never dare to believe the existence of giants tens of millions of years ago, because the theory of evolution states that at that time, there were only lower level single cell life on Earth, there was no marine life at all!

But a small number of scientists on earth are still quite open minded. They have discovered the fossil of a giant, and they also successfully formed the whole skeleton of the giant. But unfortunately, many of the so-called scientists give up on their own beliefs due to potential personal gain conflicts with authorities. It is very rare for scientists to confront and correct mistakes. In this aspect, Alien lives are more honest towards science than humans on earth. Some people may be scared of the truth about the existence of Aliens, because they fear that this will end the fallacy of atheism.

To be continued...

2. Olaf Jansen's Story

My name is Olaf Jansen. I am a Norwegian, although I was born in the little seafaring Russian town of Uleaborg, on the eastern coast of the Gulf of Bothnia, the northern arm of the Baltic Sea.

My parents were on a fishing cruise in the Gulf of Bothnia, and put into this Russian town of Uleaborg at the time of my birth, being the twenty-seventh day of October, 1811. ([Click to linked full story](#)).
