

What is Project Blue Beam?

Mike Chan, who hosts the popular youtube channel "Beyond Science" which attracts nearly 2 million followers, explains the Project Blue Beam.

## **HELL found at bottom of deepest hole on Earth?!**

<http://www.youtube.com/watch?v=RhJrNRGoUrc>

Some scientists and also people who visited the south or north poles also claimed that the Earth is hollow.

THIS VIDEO IS NOT THAT CRAZY. I worked as a maintenance crew aboard the ss discovery. We where collecting ice samples in the artic we spend 6 month there we were supposed to be there almost a year I was part of the maint crew. we abandoned the mission due to weird lights under the sea and in the air the light will shine bright and move at super sonic speeds all of our machine and tools will not work properly when the light shines and moved about. we got massive head aches and some of us vomited for days after. part of our crew member went along with some scientist to the main land and also reported light and mysterious sound coming from cave in the artic they also got sick a vomited for days after when we came back to the us we repoted this to the authorities and they told us we get 100s of claims like this and lots of missing people repots they said we can not do anything about this and threatened us not to say a word of what had happened there NOT TO GO TO THE PRESS THEY TOOK ALL OF OUR VIDEOS CAMARAS. next year my boss called me and told me that if I want it to go there again for a second expedition double the pay 250,000 in 8 month I said hell no what ever is there needs to be left alone I will not I mean never ever return to the artic. Now I work as a maint crew in a Disney cruise ship belive me or not I know what I saw and no one will ever change my mind
