

On Tuesday 12th August an extremely important briefing was held in the Waratah Room NSW Parliament house relating to the killing of political prisoners in China for the purpose of selling their organs.

Eminent speakers were Dr Sophia Bryskine of Doctors Against Forced Organ Harvesting (DAFOH), Andrea Tokaji, lawyer from Fighting for Justice Foundation (who knows about communism first hand as her family escaped from Ceaucescu's Romania in 1987) and Greens MLC David Shoebridge. Dr Damon Noto, also from DAFOH, took part in the briefing via Skype from the USA.

Nine coalition and Labor MPs had promised to attend however because the Chinese Consulate contacted all MPs and threatened them that attendance at the briefing would affect trade and business relations all nine failed to show! Only the five Greens MPs and the MP from the Animal Justice Party put in an appearance.

Remember these Liberal - Nationals are the same ones who sent 500 Australians to die in Vietnam fighting communism. Now they won't even suffer the rebuke of their own party to hear a few speeches exposing the atrocities of Communism. I simply ask: what hope is there for the security of the country when elected representatives of these so-called major parties continue to be Holocaust Deniers of the Chinese Holocaust and put trade and their own political careers ahead of standing up against gross violations of human rights by the world's biggest criminal totalitarian power?

But what can you expect seeing, as Malcolm Turnbull revealed in his speech Same Bed Different Dreams about Australia's relations with China made at the LSE on October 5, 2011, representatives of the Chinese Communist Party attend by special invitation the annual conference of the Liberal Party.

Truly, as Lenin said "When we hang the last of the capitalists they will be fighting each other for the privilege of selling us the rope."
